

FEZILE MKHIZE

MISTER SUPRANATIONAL 2024

Dr. Fezile Mkhize (33) is the 8th Mister Supranational. He won his country, South Africa's first Mister Supranational title on 4 July 2024. He is also the first Mister Supranational from the African continent.

He graduated with a Bachelor of Medicine and Surgery and is a medical doctor. He has spent time within a number of surgical disciplines from trauma, trauma ICU, Cardiothoracics and Urology.

A small town kid, he is of Zulu descent and is also a stage and screen actor having played Macbeth in a production of The MacBeths as well as being a presenter on a number of TV shows with his latest travel show airing on South African screens. He also has a podcast which discusses various health topics with experts in their fields giving awareness to his listeners about common health problems.

He has modeled for a number of years, having been in a number of campaigns and has appeared on Men's Health Covers as well as walking the runway for their fashion shows. Fezile is an avid basketball player and loves to box and gives lectures to students about the physiology and anatomy of the human body.

He has been able to enjoy scuba diving, skydiving, bungee jumping throughout southern Africa and has fallen in love with traveling and engaging with people from all walks of life, which he got to do as the presenter of a television show called Top Travel, shown on one of South Africa's most important television channels.

Dr. Fezile Mkhize has a deep appreciation for his family and has a passion for giving back to the community where his late aunt was a leader. By doing so, he hopes to honor her memory and also cultivate a strong community of young men who are able to discuss difficult issues they face without fear of stigma. He is doing this through his 'Brick by Brick' campaign. Fezile is excited to be a servant of the people wherever he goes and a positive male role model in a world where it is so much needed.

During his reign as Mister Supranational, Fezile will be an advocate for the Sasakawa Leprosy (Hansen's disease) Initiative.
