Responsible Person: Kefeyalew Bekele / Weyinshet Urgessa

1 NEEDS ASSESSMENT 1 OVERVIEW **5 ORGANIZATIONAL NEEDS ASSESSMENT** Beyond Stigma Methods used: Methods: FGD Focused group discussions, key informant interview, note-taking, Semi-structured interviews audio recording, and transcription of group dialogues. Open, inclusive, and participatory data collection approach Participants: 7 (5 M and 2 F) Executive Board members **Reach Summary:** 9 (6 males and 3 females) were ENAPAL staffs Total reached: 98 people 88 individuals affected by Hansens Deases 10 children of those affected by Hansens Deases and others Women: 40 / Teenager:1 / Older people: 31 **2** PHYSICAL AND MENTAL HEALTH RIGHTS FINDING **6** GAPS & OPPORTUNITIES **Key Findings: Key Results:** Limited funding sources. There are few number of organizations The number of new leprosy cases and associated disability rates working on leprosy. are increasing by over 100 per year within specific Hospital Absence of staff assigned for resource mobilization and fundraising Lack of access to adequate medications. Limited capacity of board members on governance, strategic planning, and effective decision-making. High levels of social stigma and discrimination, which lead to feelings of isolation and inadequate access to care. Good networking and partnership with relevant local public Mental health conditions are exacerbated by the stigma authorities and other development partners surrounding leprosy. Structures of branch association of leprosy-affected persons at regional and district level. **3 HUMAN RIGHT AND DISCRIMINATION FINDINGS** 7 CAPACITY BUILDING PROGRAMS RECOMMENDATIONS **RECOMMENDATIONS: Key Results:** Misconceptions about leprosy's transmission and severity. Capacitate staffs in proposal writing and resource mobilization training 93% felt rejected and unable to participate due to stigma. Looking for new potential donors Social isolation, discrimination in employment, and barriers to accessing healthcare services. Providing capacity building for the established branch associations through technical and financial assistance. The stigma surrounding leprosy discourages people from seeking legal protection due to fear of further discrimination Legal literacy workshops for organizational leaders or isolation. **8 WISH LIST BEFORE NEXT ILC** 4 LESSONS AND SOLUTIONS Lessons for the World Importance of engaging affected individuals in the decision-making All persons affected by leprosy access safe, respectful and process inclusive health care services. A significant gap in knowledge and skills among the community

 Patients living in isolated locations or those who are bedridden often cannot reach healthcare facilities.

Recommendations

- Develop Targeted Awareness and Advocacy Programs at schools, workplaces, and local organizations to foster understanding and inclusivity.
- Empower local associations to effectively advocate for the rights of persons affected by Hansen's disease and improve their overall quality of life.
- Establish a Network of a dedicated Specialized Healthcare Workers.

- Organizations become grant-ready and financially sustainable
- Enforcement law formulation and execution for marginalized groups
- Create active members to take part in lobby and advocay enforcemnt of laws and ratified conventions.
